the nist sematech e handbook of statistical
methods is a web based book written to help
scientists and engineers incorporate statistical
methods into their work as efficiently as
possible ideally it will serve as a reference
which will help scientists and engineers design
their own experiments and carry out the
appropriate analyses when a statistician is not
available to help fan engineering has been
written as a handbook for engineers who use
fans it is organised into four parts part i deals
with fundamental topics although these topics
are generally treated in other handbooks they
are presented here for the convenience of the
reader each subject has a bearing on fans or
fan applications part ii is about fans jun 29
