In *The Cultural Logic of Computation*, David Golumbia, who worked as a software designer for more than ten years, argues that computers are cultural "all the way down" - that there is no part of the apparent technological transformation that is not shaped by historical and cultural processes, or that escapes existing cultural politics. *The Cultural Logic of Computation* provides a needed corrective to the uncritical enthusiasm for computers common today in many parts of our culture. "Another Thirty-(Seven) Days (The Aftermath)" is an epistolary novel documenting a 37-day journey through the author's life, wherein she faced her father's swiftly declining health due to an aggressive cancer that surgery (a Glossectomy that partially removed his tongue) failed to eradicate. The father/daughter relationship was further complicated because she hadn't seen him in eight years, and he had been absent all of her adult life. Her relationships with her mentally-challenged, narcissistic, and toxic mother, as well as with her vodka-swilling ex-husband, reared their ugly heads as her father lost his battle with cancer. The author's emotions could not remain compartmentalized any longer, and her belief system in herself, and in God, gets tested. "Another Thirty-(Seven) Days (The Aftermath)" is filled with raw emotion, honesty, self-reflection, humor, music, and Scripture, and is the follow-up to the author's first book entitled "Thirty-Seven Days and One Life (A Memoir)".

Irish Journal of Sociology

One of the poorest states in the European Union during the 1980s, the Republic of Ireland's economy has grown rapidly in the 1990s, despite an overwhelming dependence on foreign capital. Echoing the 'tiger' economies of East Asia, this has led many to dub Ireland the Celtic Tiger. In this original critique by one of Ireland's leading writers on economics, Denis O'Hearn sets Ireland's economic success in an international context and contrasts and compares its growth with the other 'tiger' economies. O'Hearn addresses some difficult but crucial questions, such as whether Ireland's apparent success is self-sustaining and what lessons can be learned from the downturn of the comparable East Asian economies. The study focuses on the importance for Ireland's rising economy of three US-led industrial

sectors: computers, electrical engineering and pharmaceuticals. O'Hearn assesses who benefits and who loses from such foreign capital-led growth - in the context of working conditions, poverty, consumption and inequality - and argues that the country's apparently significant economic achievements are dominated by growth in corporate profits and professional incomes, but that there is no evidence, as yet, of 'trickle-down' to other sectors. O'Hearn's debunking of the myths associated with the Celtic tiger is a timely and convincing contribution. Because the SL R230 is regarded by many as the best looking SL that has left Stuttgart after the famous SL Gullwing. On top it is immense fun to drive, with powerful V8s and V12s to match the looks. Like the drive-train they are almost bullet-proof. Early cars suffered from quality problems that could spoil the fun factor somewhat. But all in all the R230 plays its GT role rather well, even

with six-cylinder engines. And the AMG versions are true sports cars. This book with comprehensive buyer's guide can help you to find the right one, if the R230 interests you. It was already published as e-book in 2012 and has been completely revised in Nov.2015. The book explains the VIN and data card in great detail, discusses the SBC, ABC systems and looks at potential problems with the vario-roof. Superb photography and an enjoyable test-drive in the splendid SL65 AMG are other highlights. It ends with a detailed list of the cars' technical specifications and annual production history of each model. This book uses case studies to both illuminate and examine these key managerial challenges. Each case focuses on a specific topic and is complemented with commentaries from professors and executives who have extensive front-line experience in China. The cases are the product of three-year research and are well-tested in MBA and executive courses. The authors' philosophy is that readers can learn most effectively through the experience of others captured in real cases! The book includes a broad range of companies, such as Emerson, Eli Lilly, General Motors, Peugeot, Carrefour, Daimler-Chrysler, Picanol. It also includes more personal experiences concerning the many challenges of expatriate living in China, some of whom have started their own businesses. There is a growing interest in firms' adoption of ethical and social marketing approaches among academics and practitioners alike. Ethical Marketing is the application of ethics into the marketing process, and Social Marketing is a concept that seeks to influence a target audience for the greater social good. Ethical and Social Marketing in Asia examines this so-far unexplored area, investigating why differing cultures and consumption behaviours require different emphasis in different markets. The diversity of the Asian countries provides a perplexing environment to the development and

management of ethical and social marketing. The belief that bottom line profits is enough for a company, is often not favourably viewed by Asian countries emphasising collective, social and long term benefits for the people and country. Due to these interesting characteristics and complexities, the study of ethical and social marketing in Asia is a timely topic. The first chapters introduce Ethical Marketing in Asia, followed by case studies of how the approach is used across 14 diverse economies, geographically based on 'clusters'; North East, (China, Taiwan, Japan, South Korea), South East (Singapore, Malaysia, Thailand, Vietnam, Cambodia, the Philippines, Indonesia) and South Asia (India, Pakistan, Bangladesh). The second part discusses Social Marketing using the same sequence of regions and economies and the third part explores the unique link to Fairness Management in Asia, followed by a conclusion. explores the nature of ethical and social marketing from an Asian perspective discusses current ethical and social marketing researches and practices in different areas, industries, commercial and non-commercial sectors serves as an invaluable resource for marketing academics and practitioners requiring more than anecdotal evidence of different ethical and social marketing applications compares and contrasts unethical situations covering important aspects related to ethics, society and fairness includes an interesting mix of theory, research findings and practices

Poetry. "I am spending my 39th year practicing uncreativity. On Friday, September 1, 2000, I began retyping the day's NEW YORK TIMES word for word, letter for letter, from the upper left hand corner to the lower right hand corner, page by page." With these words, Kenneth Goldsmith embarked upon a project which he termed "uncreative writing", that is: uncreativity as a constraint-based process; uncreativity as a creative practice. By typing page upon page, making no distinction between article, editorial and advertisement, disregarding all typographic and graphical treatments, Goldsmith levels the daily newspaper. DAY is a monument to the ephemeral, comprised of yesterday's news, a fleeting moment concretized, captured, then reframed into the discourse of literature. "When I reach 40, I hope to have cleansed myself of all creativity"-Kenneth Goldsmith. The classic guide to creative ideas, strategies, and campaigns in advertising, now in a revised and updated third edition In creative advertising, no amount of glossy presentation will improve a bad idea. That's why this book is dedicated to the first and most important lesson: concept. Structured to provide both a complete course on advertising and a quick reference on specific industry topics, it covers every aspect of the business, from how to write copy and learn the creative process to how agencies work and the different strategies used for all types of media. This edition has been updated to include expanded chapters on interactive advertising and integrative advertising, a new chapter on branded social media, and fifty specially drawn new roughs of key campaigns. Pete Barry outlines simple but fundamental rules about how to "push" an ad to turn it into something exceptional, while exercises throughout help readers assess their

own work and that of others. Fifty years' worth of international, award-winning ad campaigns—in the form of over 450 “roughs” specially produced by the author, fifty of which are new to this edition—also reinforce the book's core lesson: that a great idea will last forever. James was a quiet man, a hardworking father of one son, and good husband to his wife. One day a mysterious caller broke into his house and took them away and murdered them in cold blood, spiraling James' world into chaos. What would you do if you lost as much? Two detectives search for the killer in the cold barren snow covered streets of New York city and find a trail of bodies in their wake. An unknown man lurks the streets in search for his son, but finds he has to deal with his demons instead. In this, the first of a series, James tries to come to terms with what he's lost, and what's at stake, as it becomes clear that there's more at stake than he thinks, perhaps even reality itself. This is an adult oriented work of fiction which contains foul language and brutal violence. “My Mercedes Is Not for Sale” is a rollicking, witty and insightful tale of an innocent abroad which captures the high-spirited adventure of a young journalist and paints a vivid portrait of West Africa through a surprise-filled journey into its thriving car cult. “My Mercedes is Not for Sale” has all the wit and charm of John Mole's bestselling “Its All Greek to Me!” and Peter Allison's “Don't Run, Whatever You Do” and the philosophical underpinnings of Robert Pirsig's “Zen and the Art of Motorcycle Maintenance”. Dutch journalist Jeroen van Bergeijk came up with what seemed like a great scheme for making a quick profit: buy an old banger in Amsterdam and resell it in the Third World, where a market for clapped-out cars still thrives. His chariot of choice is a rusty 1988 Mercedes 190D with 140,000 miles on the clock; his route takes him from Holland through Morocco, across the Sahara, and into some of the least trodden parts of Africa. Van Bergeijk finds himself facing a driving challenge akin to a Dakar Road Rally but encounters obstacles never dreamed of by race-car drivers: active minefields, occasional banditry—mostly by the border guards - and a teenaged, chain-smoking desert guide with a fondness for Tupac lyrics. Food and water are scarce, sandstorms are frequent, and all he has to patch up his many car breakdowns thousands of miles from civilization is a bar of soap, some duct tape, and a pair of women's tights. Then there's the coup he lived through. “My Mercedes Is Not for Sale” captures more than the adventure - it vividly portrays the impact of globalization on Africa through an adventurous and sometimes dangerous journey into its thriving car culture. Best Life magazine empowers men to continually improve their physical, emotional and financial well-being to better enjoy the most rewarding years of their life. The global security environment, dominated and dependent on information and communication technology, generates an accumulation of disruptive factors for society. This volume, in direct accordance with technological developments that have facilitated information avalanche and (anonymous) communication, has required interdisciplinary research in areas such as: psychology, sociology, computer science, social media communication and legislation. The research aims to establish whether social media platforms, through the actions they facilitate, can pose risks and threats to national security and to identify premises in order to stimulate strategies that should be followed to avoid transforming various forms of online communication into a potentiating and generating factor of crime, radical or extremist opinions, mass manipulation, etc. At the same time, the research offers an alternative vision on approaching the concept of intelligence in the context of the development of social media networks (SocMInt) and promotes ways to improve and streamline how to achieve objectives that can be successfully applied, including in business intelligence. In this regard, a case study is conducted on the effects of CoVid-19 pandemic (SARS-CoV-2 coronavirus) from the perspective of law enforcement agencies. Although the individual exploitation of SocMInt does not provide a comprehensive answer, it must be used in the initial stages of decision-making and effort-making, due to the low costs compared to other Int disciplines. The volume does not present a solution to current problems, but through its didactic, documentary and informative nature it offers professional support at high standards to analysts and managers in decision making. The 300SL, the 190SL and the pagoda SL were already legends, when still in production. That has not changed till today. Names like "Gullwing" or "Pagoda" are forever associated with the SL name. Both cars are the foundation on which every new SL still rests today. And the SLK traces its roots back to the 190SL, the car that convinced management in the 1950s that the SL story was worth to be developed further. This reference book covers the

complete history of all three versions, discusses a one of a kind 300SL roadster and comes with recent non-Daimler AG color photography. If you want to know more about these iconic Mercedes cars, then this book is for you. FREE BONUS: When you have bought this book, you are eligible for a free pdf file of any Mercedes model (such as W108 or W198 or R107 for example) the author has covered in one of his books. Please contact the author through his website (inside the book) and stipulate, which free pdf file you want him to send to you. These three cars are also covered in Bernd S. Koehling's books about Mercedes cars of the 1950s and 1960s. It was suggested to have them covered in a separate book to accompany the other SL book of Bernd S. Koehling: MERCEDES-BENZ, The modern SL, available also here on Amazon. This book gives an up-close look at Mercedes-Benz roadsters, convertibles, and two-and four-seat coupes from the mid-1950s to present. With roadsters, starting with the 300SL's from the mid-1950 and continuing through the current SLK's - up to the 2003 model year. Coupes and Cabrios, this book details the 220SEb/300SE cars of 1960 and continues on up to the current CLK's to the 2003 model year. This approach better serves those who are in the market for "personal cars" by not spreading the book too thin to cover the entire Mercedes-Benz lineup. Explore all the traditional elements of the Buyer's Guide series, such as the basic histories of each model or model type, Garage Watch photos with inset photo callouts, tables of common replacement parts, quotes from contemporary magazine reviews, owner testimonials, rating charts, and specification tables. You haven't gotten yourself a R107 yet? Too bad, the good ones can cost a small fortune today and they have only one way to go: UP! But don't worry, plenty of them have been built and plenty of them are still around. Problem is, which one is the right one for you? Can you imagine that even a low mileage, good looking R107 can still far exceed your wildest imaginations, when it comes to restoration costs? Everybody seems to want a late model 560SL. Why not an early 450SL for half the money? The joy and pride of ownership is the same, trust me. Or how about one of the former longtime underdogs, an SLC? Also they start to appreciate, a few of them even very fast, faster than a mint 560SL. If any of this is of interest, then this new book (published already earlier as e-book) is for you. It does not only deal with development and history, it also comes with a comprehensive buyer's guide for both the SL and SLC. This includes a look at their price development over the past years. Another focus has been the VIN and data card, so that you have a better understanding, how they were equipped and to which market they have been shipped first. Superb recent photography from the author's collection can help you to find the right car or it might even serve as reference in a restoration project. Naturally the paint and interior upholstery options, full technical details plus the annual production history of each model are covered. As a bonus, rare insights into the R107's almost unknown rally history are given. FREE BONUS: When you have bought this book, you are eligible for a free

Alfa Romeo 916 GTV and Spider traces the complete story of the Alfa Romeo GTV and Spider models produced between 1994 - 2005, commonly known to enthusiasts by the manufacturer's project code as the 916 series. The 916 models would always be controversial - they replaced the iconic Spider, the best-selling Alfa Romeo sports model of all time, and the brand-establishing Alfetta GTV. Sharing components and a platform with a humble Fiat hatchback, would the cars ever be considered 'real' Alfa Romeos? The cars were critically acclaimed, and, though they faced tough competition in the late 1990s from the likes of the Audi TT, they remained in production for over a decade. Topics covered include: Full history of the 916 series GTV and Spider models; Design, development and evolution of the models from 1994 - 2005; Participation of the GTV in motorsport; Model variations in depth through all three facelifts; Previously unpublished production figures, and chassis numbers for the desirable, limited-edition GTV Cup model. The future of journalism is hotly contested and highly uncertain reflecting developments in media technologies, shifting business strategies for online news, changing media organisational and regulatory structures, the fragmentation of audiences and a growing public concern about some aspects of tabloid journalism practices and reporting, as well as broader political, sociological and cultural changes. These developments have combined to impoverish the flow of existing revenues available to fund journalism, impact radically on traditional journalism professional practices, while simultaneously generating an increasingly frenzied search for sustainable and equivalent funding – and from a wide range of sources - to nurture and deliver quality journalism in the future. This book brings together journalists and distinguished academic specialists from around the globe to present the findings from their research and to discuss the future of journalism, the shifting quality of its products, its wide ranging sources of finance, as well as the economic and democratic consequences of the significant changes confronting Journalism. The Future of Journalism details the challenges facing the press in contemporary societies and provides essential reading for everyone interested in the role of journalism in shaping and sustaining literate, civil and democratic societies. This book consists of special issues from Journalism Studies and Journalism Practice.
