There are no statements about equally True or False. ? It is usually very easy to identify the True answer. Remember that the question serves as an excuse to provide an information, not for assessing knowledge. ? The False answers serve to increase the contrast between True and False, and not to confuse the trainee and increase the level of difficulty. ? Whenever there is a choice of True or False, the answer is always the True. This is to prevent for a False information to be adopted. ? Whenever is asked to "Mark the True statements", expect almost all statements to be valid. This serves as an excuse to provide information, not for assessing knowledge.
